WEATHER KEY POINTS

11/05/21 - 11/11/21

Friday-Thursday

- Higher waves will result in a rip current risk across many southern California beaches through this evening, while some minor coastal flooding is also possible across far northern California, particularly in Humboldt Bay.
- Occasional bouts of showers and some high elevation snow will occur through the weekend across mainly the northern third of the state, though no significant impacts expected
- A stronger storm system could bring more widespread and heavier precipitation to northern and possibly central California Monday and Tuesday of next week, though forecast confidence in the details about precipitation timing and amounts remains low at this time. If heavier precipitation does develop, some issues could arise for recent burn scars.
